IEK Editorial Board Pays a Courtesy Visit to East Africa Spectre Limited. Tuesday 3rd February, 2026.

The Institution of Engineers of Kenya, paid a courtesy visit to East Africa Spectre Ltd, an engagement aimed at strengthening industry-institution collaboration, gaining practical insights into local manufacturing, and supporting the production of Engineering in Kenya Magazine issue twenty-five (25). The visit brought together engineering professionals, industry leaders, and IEK Editorial Board in a forum that underscored the critical role of engineering in Kenya's industrial and economic development.

The IEK delegation was led by its President, Eng. Shammah Kiteme, alongside Honorary Secretary Eng. Jacton Mwembe, Honorary Treasurer Eng. Jennifer Korir, Editorial Board Chairman Eng. Prof. Alex Muumbo, Editorial Board Secretary Eng. Dr. Caroline Matara, Editorial Board Member, Eng. Evaline Langat, and Publishing Officer, Leonard K. Kigen. The team was hosted by East Africa Spectre Ltd's Managing Director, Dr. Ida Odinga, EGH who provided an in-depth overview of the company's operations, growth trajectory, and contribution to Kenya's industrial manufacturing sector.

A key focus of the engagement was the conceptualization and content development for the 25th edition of Engineering in Kenya Magazine, a special issue themed "Celebrating Raila Odinga." The edition seeks to highlight Hon. Eng. Raila Odinga's enduring contributions to Kenya's engineering landscape, infrastructure development, and national leadership. Notably, the magazine will acknowledge his role as the principal founder of East Africa Spectre Ltd, tracing the company's origins in engineering and industrial manufacturing and its sustained contribution to strengthening Kenya's local industrial capacity. In her address, Dr. Ida Odinga, EGH commended IEK and its members for their commitment to advancing engineering professionalism and excellence in Kenya. She candidly highlighted several challenges confronting East Africa Spectre Ltd, particularly difficulties in importing essential raw materials required for the manufacture of LPG gas cylinders. According to Dr. Odinga, restrictions on large-scale imports, especially of powder coatings and other critical inputs, have significantly

IEK Editorial Board Pays a Courtesy Visit to East Africa Spectre Limited.

Tuesday 3rd February, 2026.

constrained production capacity, limiting the company's ability to fully meet market demand. Against this backdrop, Dr. Ida Odinga challenged local engineers and engineering institutions to explore opportunities for establishing indigenous manufacturing enterprises. She emphasized that local production of key industrial inputs would not only reduce reliance on imports but also create employment opportunities, enhance revenue generation, and accelerate national industrial growth. Dr. Odinga further underscored the importance of stronger collaboration between engineering professionals, academic institutions, and IEK. She noted that bridging the gap between industry and academia is essential in ensuring that graduates of engineering and technical programs acquire practical, hands-on experience alongside theoretical knowledge, thereby better preparing them for the realities of the workplace.

Addressing matters of regulation and safety, Dr. Odinga called on engineering regulatory bodies to strengthen enforcement of existing standards, particularly in the construction sector. She stressed that strict adherence to safety regulations is critical in preventing tragedies such as building collapses, which remain a pressing national concern. She also highlighted growing road safety challenges, urging all stakeholders to promote professionalism and safety on Kenya's roads.

The visit concluded with a guided tour of East Africa Spectre Ltd's facilities and deliberations on potential areas of collaboration. Both IEK and the company reaffirmed their shared commitment to advancing engineering excellence, innovation, and industry-institution partnerships in Kenya, expressing optimism that such engagements will drive the country toward greater industrial self-reliance.

PICTORIALS

Engineers at the Centre of Kenya's Transformative Development Agenda. Monday, 9th February, 2026.

Fellow Members, Since His Excellency the President delivered the State of the Nation Address, a powerful national conversation has emerged around infrastructure and transformative development. This dialogue is firmly anchored in the four visionary pillars presented by the President:

1. Investment in Our People
2. Making Kenya a Net Exporter
3. Upgrading our National Power Generation Capacity from 3,200MW to 10,000MW
4. Strategic Investment in Transportation and Logistics

We, as the Institution of Engineers of Kenya (IEK), recognize that these pillars are not just policy items but the very blueprint for our nation's future. We have analyzed this agenda and affirm that engineering expertise is the fundamental catalyst required to turn this vision into reality. Consequently, this ambitious program presents an unprecedented era of opportunity for the engineering profession. We applaud the government for this bold and forward looking plan, a vision so compelling that it has sparked sustained discourse, often termed, "The Road

to Singapore," symbolizing our collective aspiration for rapid, engineered modernization.

To ensure engineers are at the forefront of this national transformation, IEK is proactively and strategically engaging with the government. Our objective is to secure the strategic placement of engineers to lead and spearhead these critical development efforts.

However, national opportunity must meet professional preparedness. As members of IEK, we must now look inward and activate our own capacities to fully seize the moment. We must be ready to deliver with excellence, scale, and integrity. To this end, we invite every member to critically focus on the following areas:

1. Ensuring Full Regulatory Compliance: Guarantee that your practices and firms meet all statutory requirements, fostering trust and enabling seamless qualification for major projects.
2. Strengthening Institutional Capacity & Governance: Fortify your firms' project delivery capabilities, financial management, and corporate governance structures to handle larger, more

Engineers at the Centre of Kenya's Transformative Development Agenda.

Monday, 9th February, 2026.

complex contracts.

3. Formalizing Ventures: Actively register and capacitate construction companies to directly participate in the burgeoning construction ecosystem, moving beyond consultancy into implementation.

4. Fostering Collaboration: Pursue strategic Joint Ventures and consortiums to pool technical expertise, share risk, and increase our collective capacity to bid for and deliver mega-projects.

IEK's leadership is committed to advocating for you. Our active engagements include seeking a high-level audience with His Excellency President Dr. William Ruto to directly champion the pivotal role and interests of engineers in this national journey. The adage holds true: "Opportunity meets preparedness." Let us not be bystanders to history. Let us prepare with urgency, unite in purpose, and position ourselves to not only participate but to lead Kenya on the much touted "Road to Singapore".

Sincerely,

Eng. Shammah Kiteme, President, IEK.

MESSAGE OF

Condolence

ENG. BERNARD NALYANYA MASIKA

The Institution of Engineers of Kenya (IEK) extends its deepest condolences to the family, friends, and colleagues of Eng. Bernard Nalyanya Masika, a valued member of the Institution.

We mourn the loss of a dedicated professional whose contribution to the engineering fraternity and commitment to service will be fondly remembered. His passing is a great loss to the Institution and the wider engineering community.

We stand with the family during this difficult time and pray that they find comfort, strength, and peace. May his soul rest in eternal peace.

OUR VISION

A Leading Voice in Engineering

The Engineers' Corner

Eng. Jane Mwangi- Civil Engineer

1. Growing up, was there a moment, experience, or influence that first sparked your interest in engineering or problem-solving?

Yes. I marvelled at seeing “things” become. Seeing materials being put together to become something was so satisfying to me. My father practised carpentry as a hobby and I would watch and admire him as he joined pieces of wood to make a stool. He had a complete tool set and PPEs. At some point, he gave us roles as he constructed a two-bedroom iron sheets family house. I learnt how to use a tape measure to confirm excavations...my role.

2. What has been the most impactful project you've worked on, and what made it significant to you?

A boreholes rehabilitation and solarization project in Laikipia East. The smallest and the most satisfying project I have handled. Through an initiative of the National Steering Committee on Drought Response (NSCDR) I was part of the team that rehabilitated and solarized community boreholes in Laikipia East. Feeling the communities' struggle to access clean water during feasibility study and sharing in the joy of restored hope at the launch was so satisfying. The impact went beyond water as I connected with and mentored students encouraging them to pursue education with all they have. We have kept in touch to date. Engineering is about changing lives for the better.

3. What was the biggest surprise you encountered in your early years as a young engineer entering the workforce?

That there was still too much to learn, actually, more than there was to earn with the lecture room theory and the scanty skills I had gathered during my industrial attachment.

4. What key technical or personal skills have you developed along your engineering journey that you found out are crucial?

Managerial and management skills. I delight in successful living and excellent delivery of mandates, and I think for every engineer who aspires to achieve more, a good blend of managerial and management skills is crucial.

5. Growing up, who was a person you admired (not necessarily an engineer), and why did they matter to you?

My dad. With no formal training or certification, he was and still is skilled in several artisan crafts. His toolbox with planner, plumb bob level, tape measure, set square, hammers, hard hat, etc made me believe he was an “engineer” despite being a security guard at PEIL company. My first pocket tape measure was sneaked from this toolbox.

6. Would you rather start site visits early in the morning or wrap up late in the evening?

Early morning but depends on the nature of the site.

7. If you were to choose between redesigning a busy junction or managing a complex site meeting, which one would you go for?

Managing a complex site meeting, then later redesign the junction...haha.

8. Is it better to have plans drawn perfectly, or adapt them on site as needed?

Either has its own pros and cons depending on a specific project's dynamics.

9. Did you prefer studying solo or joining group discussions back in campus?

Studying solo in a quiet place. I absorb more in solitude.

The Engineers' Corner

Eng. Jane Mwangi- Civil Engineer.

10. Is there a quote or philosophy that guides your decisions or comforts you in times of stress?

It is well, it shall be well.

11. If you had a superpower to make your work easier (or life more fun), what would it be?

Teleporting.

12. Imagine you had no budget limits, no red tape, just your imagination and a skilled team. What's the dream project you'd bring to life to transform how people live, work or connect in Kenya?

A world-class high-speed rail transport connecting the five Kenyan cities and three regional gates.

13. If you had to teach a one-hour class on any topic other than engineering, what would it be about?

Academic research and writing

14. If you could instantly learn a new skill (non-engineering), what would it be?

Herbalism

15. If one day you were asked to summarize your engineering journey in one word or phrase, what would it be?

It's a lifelong learning adventure

UPCOMING EVENTS

WEBINAR

GREEN BUILDING SOLUTIONS FOR A SUSTAINABLE FUTURE

*'Explore IFC Edge and other
Certifications and Credentials'*

CHARGES:

IEK MEMBERS - Ksh 1,500
IEK NON-MEMBERS - Ksh 2,000

Date: 19th FEBRUARY, 2026 | Time: 4:00-6:00 p.m

Target Audience:

Engineering professionals in the built environment, Project Managers, Team Leads, Construction Managers, Architects, Sustainability Policy Makers

TRAINING

MASTERING KENYA LABOUR LAWS- EMPLOYMENT LAW IN PRACTICE

Date: 25th - 26th Feb 2026

Time: 9am - 4pm.

Venue: Virtual

CHARGES:

IEK MEMBERS - Ksh 15,000
IEK NON-MEMBERS - Ksh 20,000

8
CPDs

Why Attend This Training?

1. Learn how employment laws apply in real workplace situations, not just in theory.
2. Avoid costly mistakes, disputes, and penalties by understanding lawful employment practices.
3. Make informed choices on hiring, discipline, termination, and contract management.
4. Know your rights, obligations, and remedies under Kenyan employment law.
5. Apply lawful procedures that promote fairness, transparency, and accountability.
6. Stay updated with current legal requirements
7. Gain tools to manage grievances, disciplinary processes, and conflict resolution correctly.
8. Earn 8 CPD points

Target Audience:

All engineers, public officers

IMPORTANT UPDATES

REWARD MECHANISM FOR MEMBERS SUPPORTING RESOURCE MOBILIZATION

Each mobilized resource is tied to a specific event, and members may choose either a delegate fee waiver or a 5% commission.

AMOUNT MOBILIZED (KES.)	DELEGATE FEE WAIVER
100,000 - 249,999	25% waiver
250,000 - 499,999	50% waiver
500,000 - 999,999	75% waiver
1,000,000 and above	100% waiver

Integrity: Members will not be allowed to mobilize funds from their current employers or organizations where they work, particularly if these are regular or existing IEK partners, to avoid conflicts of interest.

Existing Partners: Contributions from existing or regular IEK partners will be excluded from the incentive scheme. This is intended to motivate members to pursue new partnerships and grow IEK's funding base.

Terms and Conditions, including applicable taxes, apply.

*Be visible, grow your Brand **Advertise with Us!***

The Engineering in Kenya Magazine is published by the Institution of Engineers of Kenya (IEK). The magazine has a wide audience amongst Engineering professionals and beyond, including stakeholders and policy makers both in public and private corporate entities.

Advertising with us will bring you to the attention of these stakeholders and give you the opportunity to grow your market. Our print run is 3,000 hardcopies and over 229,000 in digital circulation, bimonthly.

Get noticed in our next edition. Reach out to the IEK secretariat on 020 2729326; 020 2716922 or via email to: editor@iekenya.org

Yours faithfully,
Eng. Jacton Mwembe, PE, MIEK
Honorary Secretary
The Institution of Engineers of Kenya
