IEK Nyanza Branch Engages Learners on Leadership and Self-Confidence.

Monday 19th January, 2026.

In a bid to inspire the next generation of leaders, IEK Nyanza Branch County Representative, Eng. John Robert Otieno Ogallo, engaged learners at AIC Bar Primary & Junior School in Kisumu West Constituency, Kisumu North Ward. The mentorship session focused on the pivotal role of self-confidence in shaping leadership, discipline, and lifelong success. During the session, Eng. Ogallo encouraged the learners to embrace challenges, cultivate positive habits, and believe in their abilities as they navigate their academic and personal journeys. He emphasized that self-confidence is not only critical for personal growth but also serves as the foundation for responsible and effective leadership.

The mentorship formed part of IEK Nyanza Branch's broader initiative to connect engineers with local communities and schools, fostering awareness about engineering careers while promoting values that contribute to holistic development.

Learners actively participated in the session, sharing their aspirations and asking questions about the skills required to succeed in both academics and future careers. Eng. Ogallo's guidance reinforced the

importance of discipline, resilience, and continuous learning in achieving one's goals.

Through initiatives like this, IEK Nyanza Branch continues to demonstrate its commitment to nurturing young talent, inspiring future leaders, and strengthening the link between professional engineers and community development.

IEK Participates in KENHA's 8th Quartely Knowledge Sharing Forum.

Tuesday 20th January, 2026.

The Institution of Engineers of Kenya (IEK) proudly participated in the 8th Quarterly Knowledge Sharing Forum organized by the Kenya National Highways Authority (KeNHA) at the Barabara Plaza Auditorium. The forum, themed "Avoidance of Contract Disputes: Demystifying Management of Claims for Extension of Time, Costs and Profits," brought together key stakeholders from the roads sector to exchange knowledge and discuss innovative solutions to contemporary challenges affecting highway projects.

In line with this, IEK was represented by Eng. Grace Nduta Njoroge and Mr. Mark Oyieyo Oroko at the forum. Their participation underscored IEK's commitment to fostering collaboration, professional development, and practical knowledge-sharing among engineers in the country.

The forum addressed the complex issues facing the roads sector, including funding gaps, land acquisition disputes, environmental compliance, contractual disagreements, safety regulations, and technological challenges. Discussions emphasized the importance of clear frameworks, proactive stakeholder

engagement, and collaborative problem-solving to ensure timely and cost-effective project delivery. A highlight of the forum was the keynote presentation on contract dispute avoidance and claims management. Key takeaways included the need for continuous training of engineers on claims management, dispute avoidance, adjudication procedures, and the use of FIDIC forms of contract to enhance project execution. IEK, in collaboration with CI Arb Kenya, has been identified as a potential leader in organizing such targeted professional training for engineers.

The forum concluded with a consensus on the importance of ongoing collaboration among stakeholders to swiftly resolve disputes when they arise, thereby safeguarding project timelines and budgets. IEK remains committed to participating in such knowledge-sharing initiatives that strengthen the capacity of engineers and advance excellence in Kenya's infrastructure sector.

ENGINEERS BOARD OF KENYA
Empowering professionals

OUR VISION
Safe and sustainable engineering infrastructure.

OUR MISSION
To ensure production of globally competitive engineers and quality engineering services through regulation, capacity building and enforcing compliance with set engineering standards to meet the current and future needs of society.

OUR CORE VALUES

- Integrity
- Customer-Centric
- Accountability
- Respect
- Excellence

Delegation der Deutschen Wirtschaft für Ostafrika
Delegation of German Industry and Commerce for Eastern Africa

Engineering Leadership and Innovation Take Center Stage at the Air Quality Forum 2026.

Wednesday 21st January, 2026.

The Air Quality Forum 2026, held at the Best Western Premier Hotel, Westlands, convened engineering leaders, regulators, professional bodies, industry players, and international technology providers for a focused, results-driven dialogue on advancing clean-air solutions in Kenya. Co-organized by AHK Services Eastern Africa Ltd, with Tholander Ablufttechnik GmbH (Germany) as the technical partner, the Forum brought together key stakeholders driving Kenya's transformation toward cleaner production, sustainable industrial growth, and improved engineering practices. The discussions underscored the central role of engineering leadership, innovation, and professional standards in delivering measurable air-quality improvements while safeguarding public health and the environment. Representing The Institution of Engineers of Kenya (IEK), Mr. Joseph Anvar Alot, Policy, Research and Partnerships Manager, delivered a compelling presentation on Engineering Leadership, Innovation, and Professional Standards in Clean-Air Solutions. His address emphasized the responsibility of engineers to lead from the front through evidence

based policy engagement, adoption of innovative technologies, and strict adherence to professional and ethical standards. He highlighted IEK's role in shaping policy discourse, fostering industry partnerships, and strengthening engineering capacity to ensure clean-air interventions are practical, scalable, and aligned with national development goals. The regulatory perspective was presented by the Engineers Board of Kenya (EBK), represented by Eng. Margaret Ogai, CEO/Registrar. EBK's presentation focused on standards, innovation, and the role of engineers in achieving clean industrial air, reinforcing the importance of compliance, competency, and continuous professional development. Eng. Ogai emphasized that effective regulation when aligned with sound engineering practices and innovation acts as a catalyst rather than a barrier to cleaner, more competitive industries. The Forum's main technical presentation was delivered by Tholander Ablufttechnik GmbH (Germany), a global leader with over 30 years of

Engineering Leadership and Innovation Take Center Stage at the Air Quality Forum 2026.

Wednesday 21st January, 2026.

experience in odor control, VOC abatement, and industrial clean-air solutions. The presentation showcased proven German engineering technologies and international case studies demonstrating how advanced systems can significantly reduce emissions while improving operational efficiency. Participants gained valuable insights into how these technologies could be adapted to Kenya's industrial and regulatory context.

The event was further enriched by contributions from key industry and professional leaders, including Eng. James Mwangi of Kurrent Technologies Ltd and Eng. Jane Mutulili, President of the Association of Consulting Engineers of Kenya (ACEK). Their interventions reinforced the need for stronger collaboration between regulators, professional bodies, consultants, and technology providers to accelerate the adoption of clean-air solutions grounded in robust engineering practice.

Collectively, the discussions converged on a shared vision: cleaner air, stronger industries, and engineering-led sustainability. Speakers agreed that Kenya's pathway to improved air quality lies in integrating sound policy, enforceable standards, innovative technologies, and strong professional leadership.

The Forum concluded with a clear call to action: engineers must remain central to the design, implementation, and long-term sustainability of clean-air solutions that support industrial growth while protecting the environment and public health.

The Engineers' Corner

Eng. Maureen Mwangi- Civil Engineer

1. What inspired you to pursue a career in engineering, and how has that shaped your leadership?

A female alumnus visited our school during mentorship weekend and shared that she was studying Civil Engineering. I had never considered engineering, imagining myself as a lawyer. Seeing someone like me pursuing a similar path showed me what's possible and reminded me of the power of representation. By showing up, I hope to inspire another girl to choose engineering.

2. As a child, was there an activity or interest that hinted you might one day become an engineer?

Growing up in Nyandarua, I often complained about the poor state of roads in our county and how inadequate infrastructure held back the agricultural economy. I am part of the solution and I hopefully create impact there.

3. If you weren't an engineer, what career path would have been your second choice?

A lawyer. I loved history and I grew up idolizing Martha Karua when she was Minister for Justice and Constitutional Affairs. We also happen to share my second name Wangari.

4. What was the very first engineering task or responsibility you were trusted with, and how did it shape your confidence?

On one of my first days on site as an intern with a Contractor, I was entrusted me with taking measurements

for an Interim Payment Certificate (IPC) compilation. The task required me to liaise closely with the foreman, the surveyor, and the supervision team to ensure my measurements were accurate. I felt so proud doing it, typing them on the Laptop and submitting them, and them being used in an IPC. Looking back, I realize that my confidence has grown over time by giving myself evidence that I can tackle challenging tasks and complete them successfully.

5. Did you ever face a turning point early in your career that changed the way you saw engineering?

Yes, I did. In November 2022, I joined the McKinsey Forward Program. One of the modules focused on developing a growth mindset. It was so eye-opening. I realized that I had often been operating with a fixed mindset. I recognized how often I complained about our industry, felt resigned to the idea that engineers were not meant to succeed, and harbored a deep frustration with the profession. The module helped me understand that much is within our control, and that even in small ways can make a difference.

6. Can you share details of one or two projects you've worked on that you are most proud of?

While at the Kenya Rural Roads Authority, Murang'a Region, I was part of the team that reconstructed Maragua Town Roads and adjacent routes. I am proud of this project not only for its successful execution but also for its immediate impact: the roads revitalized the town, transforming it from nearly lifeless to a hub of economic activity. I am especially proud of the last roads project I led where I led the design and supervision team. This project formed the basis for my professional registration, fundamentally shaping the trajectory of my career and enabling me to pursue my current work. I am deeply grateful for the mentorship and growth I have gained through every project. Each lesson and challenge has inspired me to reach new heights in my career.

7. What lesson has your career in engineering taught you that you'd like to pass on to the next generation?

Engineers can be multi-passionate. They can love music, fashion, travel, cars, or any pursuit that sparks their

The Engineers' Corner

Eng. Maureen Mwangi- Civil Engineer.

curiosity and still excel in their engineering careers.

8. Over the years, what has been the most surprising lesson the profession has taught you?

Engineering teaches you to be a systems thinker. It provides the structure and logic needed for sound decision-making, requiring you to consider the broader impact whether in design or supervision. I approach even minor problems by breaking them into components and analyzing cause-and-effect before making decisions. This mindset also builds resilience, as constant problem-solving reinforces the belief that challenges can be overcome.

9. Which skills beyond technical knowledge have been most valuable in your growth as a professional?

Project Management. In 2023, I pursued the Project Management Professional (PMP) certification. My greatest takeaway was gaining the ability to effectively manage risks, coordinate teams, and respond to changes all while keeping projects on track and aligned with objectives.

10. Has there been a piece of advice from a mentor that you still carry with you today?

I was part of a Girls for Girls Program in 2021. One of the mentors advised us to invest in our gathering years as all good things take time. She also emphasized that it was important to not stay too long gathering, always preparing but never building up. This has stayed with me ever since.

11. When guiding younger engineers, what principle do you try to instill in them above all else?

The confidence in their ability to figure things out and getting things done.

12. What's one random fact or talent about you that most colleagues don't know?

I am a natural planner. I think through details meticulously, and when I don't, my mind tends to spiral into chaos. This tendency inspired me to create my own planner, which I am now selling.

13. If you could instantly learn a new skill(non-engineering), what would it be?

Cycling. I can't cycle to save my life and its honestly embarrassing. I still hope to learn it someday.

14. If one day you were asked to summarize your engineering journey in one word/phrase, what would it be?

At every stage of my engineering journey, I hold onto the belief that the best is yet to come.

IMPORTANT UPDATES

EXPRESSION OF INTEREST

Part-Time Article Developers/Writers – Engineering in Kenya (EiK) Magazine

The Institution of Engineers of Kenya (IEK) invites Expressions of Interest (EOIs) from qualified and motivated individuals to serve as Part-Time Article Developers/Writers/Interviewers for its flagship publication, Engineering in Kenya (EiK) Magazine.

About the Publication

Engineering in Kenya (EiK) is IEK's official magazine, dedicated to promoting engineering excellence, innovation, professional practice, policy discourse, and national development through bimonthly themed high-quality editorial content.

Eligibility Requirements

Interested applicants should demonstrate:

- ✓ Background or strong interest in engineering, technical writing, journalism, research, or related fields
- ✓ Proven ability to produce clear, accurate, and high-quality written content
- ✓ Familiarity with engineering practice, policy, or industry trends is an added advantage
- ✓ Strong communication skills and ability to meet editorial deadlines

**CLICK HERE TO
APPLY**

All Expressions of Interest
should be received on or before
3rd February, 2026

8
CPDs

Why Attend This Training?

1. Learn how employment laws apply in real workplace situations, not just in theory.
2. Avoid costly mistakes, disputes, and penalties by understanding lawful employment practices.
3. Make informed choices on hiring, discipline, termination, and contract management.
4. Know your rights, obligations, and remedies under Kenyan employment law.
5. Apply lawful procedures that promote fairness, transparency, and accountability.
6. Stay updated with current legal requirements
7. Gain tools to manage grievances, disciplinary processes, and conflict resolution correctly.
8. Earn 8 CPD points

Target Audience:

All engineers, public officers

Call for Expression of Interest for Mentors and Mentees Linkage.

Friday 5th December, 2025.

CALL FOR EXPRESSION OF INTEREST FOR MENTORS AND MENTEES LINKAGE

Mentorship Categories

- Academic Excellence
- Research
- Manufacturing
- Engineering consultancy
- Political leadership
- Professional Registration
- Career progression

The Institution of Engineers of Kenya is doing this call for mentors and mentees to foster a structured Mentorship to enhance growth, knowledge sharing, and professionalism through mentorship among members

This will offer a platform to give back or gain guidance.

[Click here to express your interest as either a Mentor or a Mentee](#)

Expression of Interest – Accelerating The Green Transition Through Skills and Innovation: Kenya, February 2026.

Royal Academy of Engineering

Dear Esteemed Members,

The Institution of Engineers of Kenya (IEK) invites members to express their interest in participating in the “Accelerating the Green Transition through Skills and Innovation” Symposium, taking place in Nairobi, Kenya, from 11th to 13th February 2026.

This event is a collaboration between the Royal Academy of Engineering, UNEP, AGSO, and Jacob’s Ladder Africa, and is funded by the UK Government’s Department for Science, Innovation and Technology.

Members interested in participating are requested to complete the application form using the link provided. Please note that places are limited and competitive, and submitting a form does not guarantee selection. Successful applicants will be notified by late December 2025.

The symposium will explore global challenges related to the green transition through skills and innovation, with sessions covering multiple sub-themes. Participants will join experts from policy, innovation, industry, and civil society to examine skills gaps, informal labour transformation, and context-driven innovation, using Kenya as a case study.

Participant Commitments:

- Attend all sessions, including external activities, dinners, and receptions.
- Full participation is required to maximize networking and learning opportunities.

Costs:

The Academy will cover travel, accommodation, and subsistence, with additional support for access requirements or caring responsibilities available on request.

IMPORTANT UPDATES

REWARD MECHANISM FOR MEMBERS SUPPORTING RESOURCE MOBILIZATION

Each mobilized resource is tied to a specific event, and members may choose either a delegate fee waiver or a 5% commission.

AMOUNT MOBILIZED (KES.)	DELEGATE FEE WAIVER
100,000 - 249,999	25% waiver
250,000 - 499,999	50% waiver
500,000 - 999,999	75% waiver
1,000,000 and above	100% waiver

Integrity: Members will not be allowed to mobilize funds from their current employers or organizations where they work, particularly if these are regular or existing IEK partners, to avoid conflicts of interest.

Existing Partners: Contributions from existing or regular IEK partners will be excluded from the incentive scheme. This is intended to motivate members to pursue new partnerships and grow IEK's funding base.

Terms and Conditions, including applicable taxes, apply.

*Be visible, grow your Brand **Advertise with Us!***

The Engineering in Kenya Magazine is published by the Institution of Engineers of Kenya (IEK). The magazine has a wide audience amongst Engineering professionals and beyond, including stakeholders and policy makers both in public and private corporate entities.

Advertising with us will bring you to the attention of these stakeholders and give you the opportunity to grow your market. Our print run is 3,000 hardcopies and over 229,000 in digital circulation, bimonthly.

Get noticed in our next edition. Reach out to the IEK secretariat on 020 2729326; 020 2716922 or via email to: editor@iekenya.org

Yours faithfully,
Eng. Jacton Mwembe, PE, MIEK
Honorary Secretary
The Institution of Engineers of Kenya
