IEK Engages Nation Media Group to Strengthen Educational Partnerships.

Tuesday, 9th December, 2025.

The President of the Institution of Engineers of Kenya (IEK), Eng. Shammah Kiteme, held a strategic meeting with representatives from Nation Media Group (NMG) to explore avenues for strengthening collaboration following the success of the Newspapers in Education (NiE) programme. The initiative has already provided over ten schools with access to the Daily Nation and Taifa Leo newspapers, promoting educational growth and engagement among students.

The meeting focused on enhancing the impact of the NiE programme and identifying further opportunities for collaboration between IEK and NMG. Discussions also explored innovative ways to integrate media and educational initiatives to benefit schools and foster greater awareness of STEM and engineering-related topics among students.

Representatives from Nation Media Group (NMG) attending the meeting included Mr. Nuhu Bakari, Mr. David Muchungu, Mr. Anthony Mutunga, and Mr. John Wanjohi, who brought their expertise in education coordination, editorial management, and commercial operations to the discussion. The dialogue

underscored the shared commitment of IEK and NMG to advance educational opportunities and support young learners in developing critical skills for the future.

Through continued partnership, IEK aims to leverage media platforms to inspire and educate the next generation of engineers, reinforcing the Institution's commitment to professional development, community engagement, and youth empowerment.

IEK Joins KEPSA Members' During Their End-of-Year Cocktail Celebration.

Wednesday, 10th December, 2025.

The Institution of Engineers of Kenya (IEK) participated in Kenya Private Sector Alliance End of Year Cocktail Party that was held at Novotel Hotel, Westlands, offering a vibrant platform for members of the business community to celebrate the year's milestones. The gathering reflected on a year defined by growth, collaboration, and impactful private sector initiatives, while fostering opportunities for renewed partnerships and meaningful connections.

Representing the Institution of Engineers of Kenya (IEK) was Eng. Jennifer Gache, Council member, whose attendance signalled IEK's commitment to engaging with key stakeholders across the private sector. Her participation in discussions throughout the evening reflected the Institution's proactive approach in fostering dialogue on issues that influence Kenya's engineering and business landscapes.

The Chief Guest, Dr. David Ndi, emphasized that Kenya stands at a defining moment where the nation's ambition for shared prosperity must be matched with a renewed focus on export-led, job-

creating growth. He outlined BETA and Beyond as a bold strategic blueprint aimed at increasing production, enhancing competitiveness, and confidently accessing global markets.

The evening's programme featured reflections on a year defined by growth, collaboration, and impact, with emphasis on building meaningful connections that will strengthen ties within the profession.

IEK Holds the 2025 President's Dinner & Christmas Cheer at Panari Hotel, Nairobi.

Thursday, 11th December, 2025.

The Institution of Engineers of Kenya (IEK), held its President's Dinner at Panari Hotel, Nairobi creating an elegant evening that brought together engineers, industry partners, and key stakeholders in the profession. The gathering provided a platform for connection, reflection, and recognition of the engineering community's collective achievements throughout the year.

The event was graced by Dr. David Oginde, PhD, FCS, who is the Chairperson of Ethics and Anti-Corruption Commission as the Chief Guest. The event was also highlighted by the presence of distinguished guests, including Eng. John Kipng'etich Mosonik, Director to the Board of KenGen, Eng. Wilfred Oginga the Director of Urban Roads Planning & Design at KURA, Eng. Prof. Lawrence Gumbe; Board Chairman at NUPEA and Eng. James Mwangi who is the Chief Executive Officer of Kurrent Technologies Ltd.

The evening also featured MCA Tricky, whose participation added to the evening's engagement and provided entertaining moments that enriched the experience for attendees. A notable feature of the dinner was the graduation of Cohort 1 of the She2She

Program which marked a significant milestone in IEK's efforts to champion mentorship and leadership representation for women in the engineering profession, underscoring the institution's commitment to nurturing talent and fostering diversity within the sector.

In addition to fellowship and celebration, the evening set the stage for awards and recognitions that honoured outstanding contributions to the profession. These recognitions underscored the value of dedication, innovation, and leadership among engineers and supporters of the engineering agenda in Kenya.

IEK members and partners departed the dinner with renewed resolve to advance the profession with integrity, innovation, and collaboration. The President's Dinner reinforced the importance of community, shared purpose, and collective pursuit of engineering excellence as the Convention continued to shape the future of the profession.

IEK Holds the 2025 President's Dinner & Christmas Cheer at Panari Hotel, Nairobi.

IEK Honours Engineers with IEK Presidential Award 2025 During President's Dinner & Christmas Cheer. Thursday, 11th December, 2025.

During the IEK President's dinner and Christmas Cheer, the President of The Institution, Eng. Shammah Kiteme led in presentation of prestigious 2025 IEK Presidential Awards in recognition of exceptional leadership, innovation, and service of awardees to the engineering profession.

The following engineers were awarded: Eng. Prof. Lawrence Gumbe received the award for his exceptional leadership of the Editorial Board, overseeing the production of 24 issues of Engineering in Kenya (EiK) Magazine, 12 issues of the African Journal of Engineering Research and Innovation (AJERI), and coordinating the first AJERI Conference at Kenyatta University in July 2025.

The second awardee was Ms. Jasmine Wambui who was recognised for her outstanding work as a journalist, articulating engineers' issues with clarity and compassion, and highlighting matters affecting their welfare.

Additionally, Eng. Jennifer Gache received the 2025 IEK Presidential Award 2025 for her leadership in spearheading the first Women Engineers Convention (WEC) in May 2025, a milestone event celebrating and empowering women in engineering.

Eng. Annette Ingaiza was acknowledged for her innovative mentorship of the next generation of

engineers, fostering professional growth and nurturing future engineering talent.

Eng. James Karori Nyabuto was also recognised for leading the development of the IEK Site Inspection Handbook, a vital resource enhancing professional practice and standards among engineers in Kenya.

Moreover, Eng. Lillian Kilatya received the award for her exemplary leadership and outstanding engagement with IEK members across all classes, consistently inspiring the membership and strengthening the Institution's community.

Through these awards, the IEK President highlighted the significant contributions of members whose dedication, service, and professional excellence continue to advance the engineering profession in Kenya. The Presidential Awards remain a hallmark of distinction, celebrating members who inspire and shape the future of engineering.

Cohort 1 of She2She Mentorship Programme graduates during 2025 IEK President's Dinner and Christmas Cheer. Thursday, 11th December, 2025.

The Institution of Engineers of Kenya in partnership with the Women Engineers Committee (WEC), celebrated a landmark achievement at the 2025 Presidents Dinner with the graduation of Cohort 1 of the She2She Mentorship Programme. The ceremony marked the successful completion of the programme's inaugural cycle and recognised the dedication and professional growth of its participants.

Led by Eng. Jennifer Gache, the Chairperson of Women Engineers Committee of IEK (WEC) the She2She Programme provides structured mentorship, leadership training, and professional guidance for women engineers at various stages of their careers. Graduates of the first cohort demonstrated resilience, commitment, and readiness to assume leadership roles within the engineering sector. Their progression reflects the tangible impact of mentorship in fostering confidence, skills, and professional growth.

The initiative is part of IEK's broader vision to promote gender inclusion and equitable opportunities in engineering. By pairing emerging women engineers with experienced mentors, She2She equips participants with the tools to

navigate challenges, advance their careers, and strengthen professional networks, while addressing gaps in leadership representation.

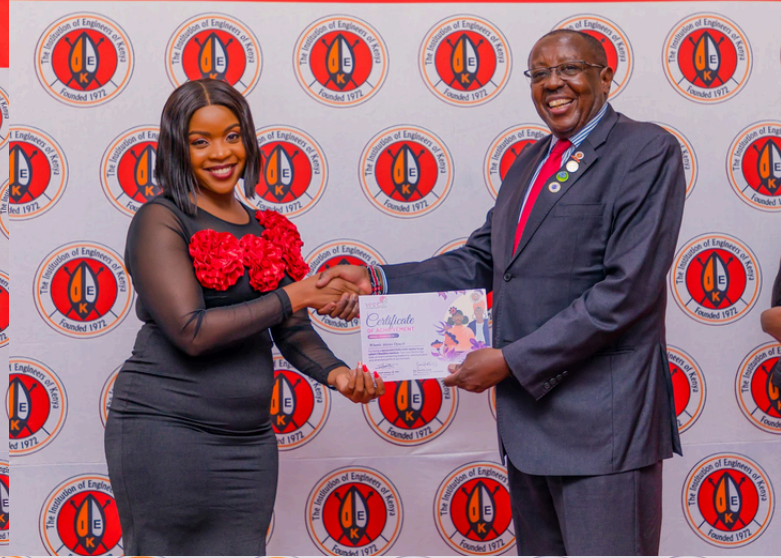

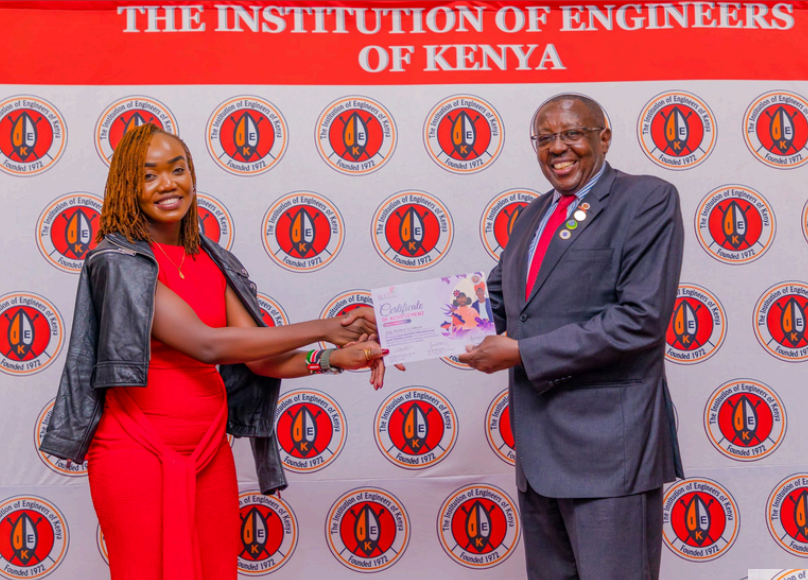

The graduation highlighted the graduates' achievements and reaffirmed IEK's commitment to empowering women in engineering. As these professionals advance in their careers, they carry forward the values of mentorship, leadership, and collaboration, setting a strong foundation for a more inclusive and dynamic future in Kenya's engineering community.

Dear Esteemed Members,

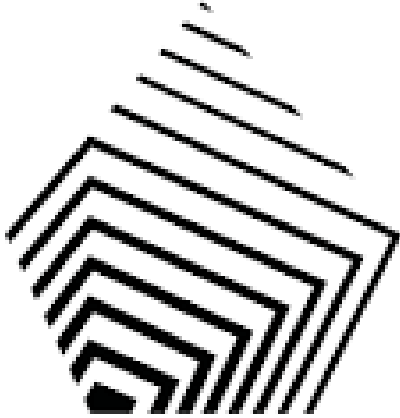

The Institution of Engineers of Kenya (IEK) invites members to express their interest in participating in the Mentors and Mentees Linkage.

This initiative aims to foster a structured Mentorship that enhances professional growth, knowledge sharing, and professionalism. Through this programme, members will have an opportunity to give back and gain guidance.

Kindly click the link to express your interest as either a Mentor or Mentee:

Expression of Interest - Accelerating The Green Transition Through Skills and Innovation: Kenya, February 2026.

Royal Academy of Engineering

Dear Esteemed Members,

The Institution of Engineers of Kenya (IEK) invites members to express their interest in participating in the “Accelerating the Green Transition through Skills and Innovation” Symposium, taking place in Nairobi, Kenya, from 11th to 13th February 2026.

This event is a collaboration between the Royal Academy of Engineering, UNEP, AGSO, and Jacob’s Ladder Africa, and is funded by the UK Government’s Department for Science, Innovation and Technology.

Members interested in participating are requested to complete the application form using the link provided. Please note that places are limited and competitive, and submitting a form does not guarantee selection. Successful applicants will be notified by late December 2025.

The symposium will explore global challenges related to the green transition through skills and innovation, with sessions covering multiple sub-themes. Participants will join experts from policy, innovation, industry, and civil society to examine skills gaps, informal labour transformation, and context-driven innovation, using Kenya as a case study.

Participant Commitments:

- Attend all sessions, including external activities, dinners, and receptions.
- Full participation is required to maximize networking and learning opportunities.

Costs:

The Academy will cover travel, accommodation, and subsistence, with additional support for access requirements or caring responsibilities available on request.

CLICK HERE TO EXPRESS YOUR INTEREST

The Engineers' Corner

Eng. Nelly Kosgei- Electrical Principal Tech, Drilling Department at KenGen.

1. What inspired you to pursue engineering, and how did you find your way in this field?

Growing up in Kitale, I was inspired by people in my village who worked with Kenya Power, especially seeing them go to work and return home driving. That exposure made me want to become an electrical engineer from a very young age. Although I did not qualify for direct university entry after high school, I joined the Kenya Power Training School for my diploma. That path allowed me to formally train in electrical engineering and begin my professional journey in the field.

2. What is your role currently at Kengen especially in drilling section?

I am currently a Principal Technician in the drilling section at KenGen, where I focus on the electrical installation and maintenance of drilling equipment. My role covers all five main systems of a drilling rig: the power system, which includes generators, fuel, and the control room; the circulation system, responsible for pumping drilling fluid and suspending cuttings; the hoisting system, which lifts and manages the drill string; the rotary system, which rotates the drill string to crush rock formations; and the well control system, including the blowout preventer and accumulator to manage well pressure. I ensure that these systems operate efficiently through semi-annual,

preventive, and corrective maintenance while maintaining detailed technical documentation. My daily routine involves taking equipment readings, logging operating parameters, and managing the electrical team to ensure that each shift is properly staffed. In essence, I oversee both the technical performance and team management aspects of the rig's electrical systems.

3. Looking back on your engineering journey, which projects whether personal or group are you most proud of and why do they stand out to you?

One of the projects I am most proud of is the Aluto Geothermal drilling project in Ethiopia, implemented for the Ethiopian Electric Power (EEP). Our team successfully drilled over ten productive geothermal wells within a short period, making it one of the most successful projects compared to earlier attempts. I was directly involved in the project, working on the rig operations, and it stands out because of its strong technical success, efficiency, and contribution to geothermal power generation.

4. If you could go back to University, what's one non-engineering subject you'd study for fun?

I would choose communication and marketing. I've seen how strong communication skills can shape narratives, influence perspectives, and create impact. In today's world, attention is a powerful currency, and mastering communication would be both fun and extremely valuable.

5. What's a fun fact about you that even your colleagues do not know?

I once seriously considered becoming a nun. Coming from a Catholic background, I was in active communication with the Consolata Missionary Sisters during my early high school years, and my elder brother later became a priest. Along the way, school life, sports, and new interests took a different turn, and that calling faded but it's a part of my journey that surprises many people today.

6. What dreams did you have while growing up. Are you living the dream right now?

Growing up, my dream was to become an engineer. I was inspired by seeing engineers in my community driving cars and doing well. Although I didn't qualify for direct university

The Engineers' Corner

Eng. Nelly Kosgei- Electrical Principal Tech, Drilling Department at KenGen.

entry and took the longer diploma route, I stayed on that path and fulfilled my dream by remaining in the engineering field.

7. What's your personal view on registration of professional engineers in Electrical & Electronics Field?

I am a strong advocate for professional engineer registration. The process is straightforward, submit your training, experience, and project reports to the Engineers Board of Kenya, then attend oral and written interviews. While some perceive the electrical panel as tough, it is friendly and manageable if you document your work well. Registration showcases your skills and problem-solving ability, and every engineering discipline benefits from it.

8. What is the best decision you have ever made?

It was choosing to go to Kenya Power Training School instead of pursuing a teaching career, even though I had admission options for both. More recently, another major decision was accepting a UNICAF partial scholarship to pursue an MSc in Oil and Gas with Energy Management, instead of self-sponsoring a master's degree at Kenyatta University. I am currently completing this MSc and am proud to be nearing the end, as it also positions me toward my long-term goal of pursuing a PhD before the age of 40.

9. Do you have a favourite sport. And if so, which team are you cheering for?

I am a football fan, and I support Arsenal. I'm part of the Arsenal Fans Club in Kenya and Africa, and this year, out of about 3,000 people at a fans' festival in Kigali, I was lucky enough to be one of five selected to travel to London and watch a game at the Emirates Stadium. Everything, from travel to visa, was sponsored, and I still can't believe how lucky I was.

10. If you were designing a school curriculum, what non-engineering skill would you include for every student?

I would include communications skills, because students need to learn how to express themselves clearly, collaborate effectively, and present their ideas confidently skills that are essential in any career, including engineering.

11. If your engineering journey was a movie genre, what would it be, action, sci-fi, drama or documentary?

I would say my engineering journey is like a documentary. It's been a path of continuous learning and growth moving through different schools, gaining practical skills, completing multiple diplomas, and eventually pursuing my master's. Each stage has added a chapter to my story, full of challenges, lessons, and achievements, shaping me into the engineer I am today.

12. Is there a quote or philosophy that guides your decisions or comforts you in times of stress?

Engineering knows no gender. In any engineering task or workplace, what truly matters is doing the work correctly and mastering the fundamentals. Focusing on getting the basics right keeps me grounded and reminds me that skill, diligence, and integrity matter more than labels or stereotypes

13. If you could instantly learn a new skill (non-engineering), what would it be?

Emotional Intelligence.

14. If one day you were asked to summarize your engineering journey in one word/phrase, what would it be?

A rollercoaster.

REWARD MECHANISM FOR MEMBERS SUPPORTING RESOURCE MOBILIZATION

Each mobilized resource is tied to a specific event, and members may choose either a delegate fee waiver or a 5% commission.

AMOUNT MOBILIZED (KES.)	DELEGATE FEE WAIVER
100,000 - 249,999	25% waiver
250,000 - 499,999	50% waiver
500,000 - 999,999	75% waiver
1,000,000 and above	100% waiver

Integrity: Members will not be allowed to mobilize funds from their current employers or organizations where they work, particularly if these are regular or existing IEK partners, to avoid conflicts of interest.

Existing Partners: Contributions from existing or regular IEK partners will be excluded from the incentive scheme. This is intended to motivate members to pursue new partnerships and grow IEK's funding base.

Terms and Conditions, including applicable taxes, apply.

*Be visible, grow your Brand **Advertise with Us!***

The Engineering in Kenya Magazine is published by the Institution of Engineers of Kenya (IEK). The magazine has a wide audience amongst Engineering professionals and beyond, including stakeholders and policy makers both in public and private corporate entities.

Advertising with us will bring you to the attention of these stakeholders and give you the opportunity to grow your market. Our print run is 3,000 hardcopies and over 229,000 in digital circulation, bimonthly.

Get noticed in our next edition. Reach out to the IEK secretariat on 020 2729326; 020 2716922 or via email to: editor@iekenya.org

Yours faithfully,

Eng. Jacton Mwembe, PE, MIEK

Honorary Secretary

The Institution of Engineers of Kenya
